"I was so impressed with hypnotherapy that I then went on to the course for stopping smoking. I am now a non smoker. I'd previously tried to quit on numerous occasions, but with hypnotherapy, something kicked in and I have quit for good. What most impressed me were the relaxation techniques, the speed in which it worked."

- Emma Thomas, Student

IMPROVE YOUR MEMORY

The well-researched phenomenon of "state-dependent learning" demonstrates one thing: you must be at the right level of relaxation to learn – and recall it. I teach you cutting-edge tools to maximise your ability to use your brain, so you easily learn, store and recall information.

I'll teach you "memory tricks" pros use, so you'll be able to remember information much more easily and quickly. Plus you'll get a special hypnosis CD with your sessions, so you can keep improving your memory for years to come!

STOP PROCRASTINATING!

Do you get angry and annoyed with yourself? Are you despairing that you can't seem to "get yourself into gear"? Are you intimidated by the amount of notes to go through? Would you like to feel motivated to get started? And stop finding things to distract yourself? Many students are shocked at how late they leave important revision, and feel trapped.
